Padang City, West Sumatra, Indonesia

PROFILE

I am a Web Programmer who graduated with a Bachelor's degree in Information Systems and has a high interest and commitment in the world of technology, especially web-based application development. I have experience in building systems from frontend to backend, using technologies such as PHP, Laravel, JavaScript, ¡Query, HTML, CSS, and MySQL and PostgreSQL databases. I am used to working in teams and individually, using tools such as Git, Postman, and VS Code to support the development process. In every project, I always try to create a system that is not only functional, but also efficient, user-friendly, and easy to maintain. I also enjoy learning new things, keeping up with technological developments, and being open to receiving input to improve the quality of work. For me, building digital solutions is not just about writing code, but also understanding user needs and providing the best solutions. I am open to collaboration, freelance projects, and professional job opportunities in the field of web development.
